

Blade Replacement for your Safety Razor

To change the blade of a MERKUR razor with a twist knob, please follow this guide. These steps are specifically designed for our two-piece razors.

1. **Preparation:** Ensure your hands and the razor are completely dry to avoid any slipping. It's best to work in a dry environment and have a clean, dry towel nearby to wipe your hands if needed.
2. **Loosen the razor cap:** Hold the handle of the razor firmly and turn the twist knob at the bottom of the handle counterclockwise. This will loosen the cap that holds the blade. Continue turning until the cap is completely loose and can be removed.
3. **Remove the old blade:** Carefully lift off the cap. The old blade is now exposed and can be safely removed. Grasp the blade by the non-sharpened edges to avoid cuts.
4. **Insert a new blade:** Take a new razor blade from its packaging and place it on the blade holder in the cap. Make sure the blade is properly aligned and that the holes or slots in the blade match the retaining pins in the cap.
5. **Tighten the cap:** Hold the handle of the razor firmly and turn the twist knob at the bottom of the handle clockwise until the cap is securely fastened to the razor. Be careful not to overtighten to avoid damaging the mechanism.

These steps ensure a safe and efficient blade change for your MERKUR razor. Always follow the safety instructions and handle razor blades with care.

Examples for Two-Piece Safety Razors

To give you an overview of our range of two-piece safety razors, we present here three of our bestsellers:

MERKUR 34C

The MERKUR 34C razor series is also known among fans by the abbreviation "HD", short for Heavy Duty. This nickname was earned by the safety razor in the 1980s due to its weight. It remains a popular choice for those who appreciate a well-balanced, robust razor.

MERKUR 37C

The MERKUR 37C is a slant razor designed for wiry and dense beard growth. With its weight and slanted razor head, it effortlessly and thoroughly tackles even the toughest tasks. Its fans call it the "Sledgehammer" for its ability to handle heavy-duty tasks. This razor is particularly favored by those seeking an exceptionally close shave.

MERKUR 38B

The development of the 38C dates back to the early 2000s. The two-tone handle with black anodized aluminum highlights the modern design. With its high weight, it guides the blade almost by itself. Its stylish appearance and performance make it a standout in any shaving kit.

Quality Made in Germany

"Made in Germany" stands worldwide for outstanding quality, precision, and reliability. It symbolizes the passion and craftsmanship that go into every product. German products are synonymous with longevity and excellence.

In a time dominated by mass production and short-lived products, we at Merkur Stahlwaren offer a promise with "Made in Germany": consistent quality and sustainable manufacturing.
